Why choose a Mitsubishi Electric air purifier?

MA-E85R-E

MA-E100R-E

What is indoor air quality?

The term “Indoor air quality” refers to the air quality in buildings, facilities, and enclosed spaces with a direct impact on occupants’ health and safety.

A space free of impurities and contaminants contributes to personal well-being, helping to:

Avoid illnesses caused by germs and microorganisms, e.g. viruses and bacteria

Reduce allergic symptoms

Improve sleep and rest quality

Improve blood circulation and general health

Why choose an air purifier and what you need to consider

Air purifiers are generally composed of a fan and a series of high performance filters capable of intercepting and neutralizing the main airborne contaminants.

One of the main parameters used to establish the effectiveness of an air purifier is the **CADR** or Clean Air Delivery Rate provided by the appliance.

The higher the CADR, the greater the effectiveness and air purification capacity.

Why choose our purifiers?

High capacity air purification with short cleaning times

Thanks to their very high Clean Air Delivery Rates, Mitsubishi Electric air purifiers can clean the air in rooms of up to 100m² with a CADR of up to 612 m³/h, one of the highest in the residential air purifiers market.

The filtration system captures more than 99% of microscopic airborne particles with a HEPA filter, removes odours, and neutralizes harmful substances such as formaldehyde by means of an activated carbon filter (combined with a platinum catalytic filter).

Easy use and maintenance

Mitsubishi Electric air purifiers are designed so that the filters can last for up to 8 years, resulting in a big reduction in maintenance costs.

Perfect for your comfort whatever the space

Minimalist, simple and rational styling with compact dimensions make it possible to install Mitsubishi Electric air purifiers unobtrusively in any convenient corner of the room. The appliances are designed to be easily transportable so they can be easily positioned wherever you prefer.

The clean air you deserve

MA-E85R-E

CADR
508
m³/h

ELEGANT SIMPLICITY

Mitsubishi Electric Air Purifiers offer a minimalist look with clean lines and neutral colours so they blend perfectly with all types of décor.

ATTENTIVE TO AIR PURITY

Mitsubishi Electric air purifiers monitor air quality in the room, measuring the concentration of PM2.5, dust and odours in the room by means of dedicated sensors.

MA-E100R-E

CADR
612
m³/h

SILENCE IN THE AIR

Clean air sounds like a gentle breeze through leaves (22dB(A)*), a sound that is emulated by Mitsubishi Electric Air Purifiers in the Low and Night modes.

DURABLE QUALITY

The minimalist styling of the air purifiers is timeless. Perfect for any room.

Likewise their operation: easy to maintain, quick to clean, and with a lifetime guaranteed for years, Mitsubishi Electric appliances are designed to assure long-lasting performance.

MA-E85R-E and MA-E100R-E Air purifiers

MA-E100R-E

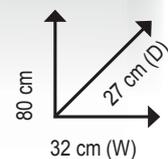

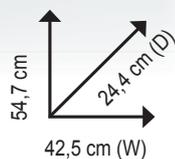

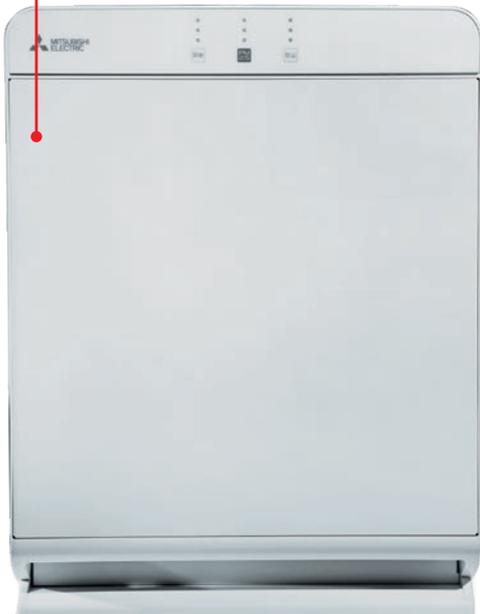

CADR
612
m³/h

- The ideal solution for large spaces
- Occupancy sensor: i-See Sensor
- Automatic movements and louvres control
- One of the highest CADRs in its class
- Styling developed around the minimum possible footprint

MA-E85R-E

CADR
508
m³/h

- Clean the air in your home in record time
- Self-cleaning system
- Compact dimensions
- Designed for apartments

Perfect for any room

MA-E85R-E Air purifier

IMPROVE THE AIR YOU BREATHE

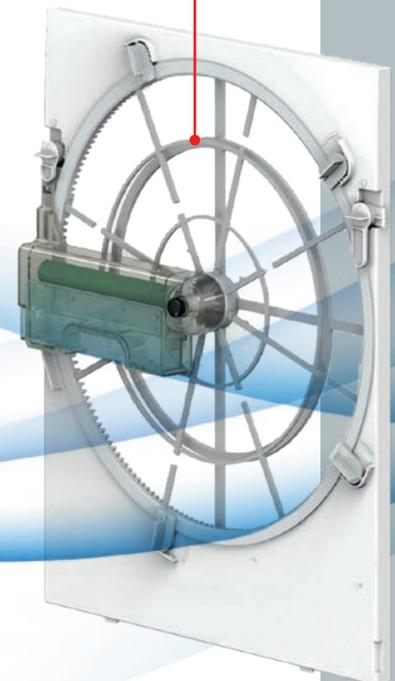

Compact, with clean and minimalist lines, model MA-E85R-E offers outstanding air filtration capacity!

With its three filters (+1) it cleans the air of PM2.5 particles, viruses, bacteria, dust, and allergens, also removing unpleasant odours.

Traps large diameter particles and transfers them to the dedicated dust box

Self-cleaning pre-filter with dust-capture system

The last word in filtration, with 3+1 levels

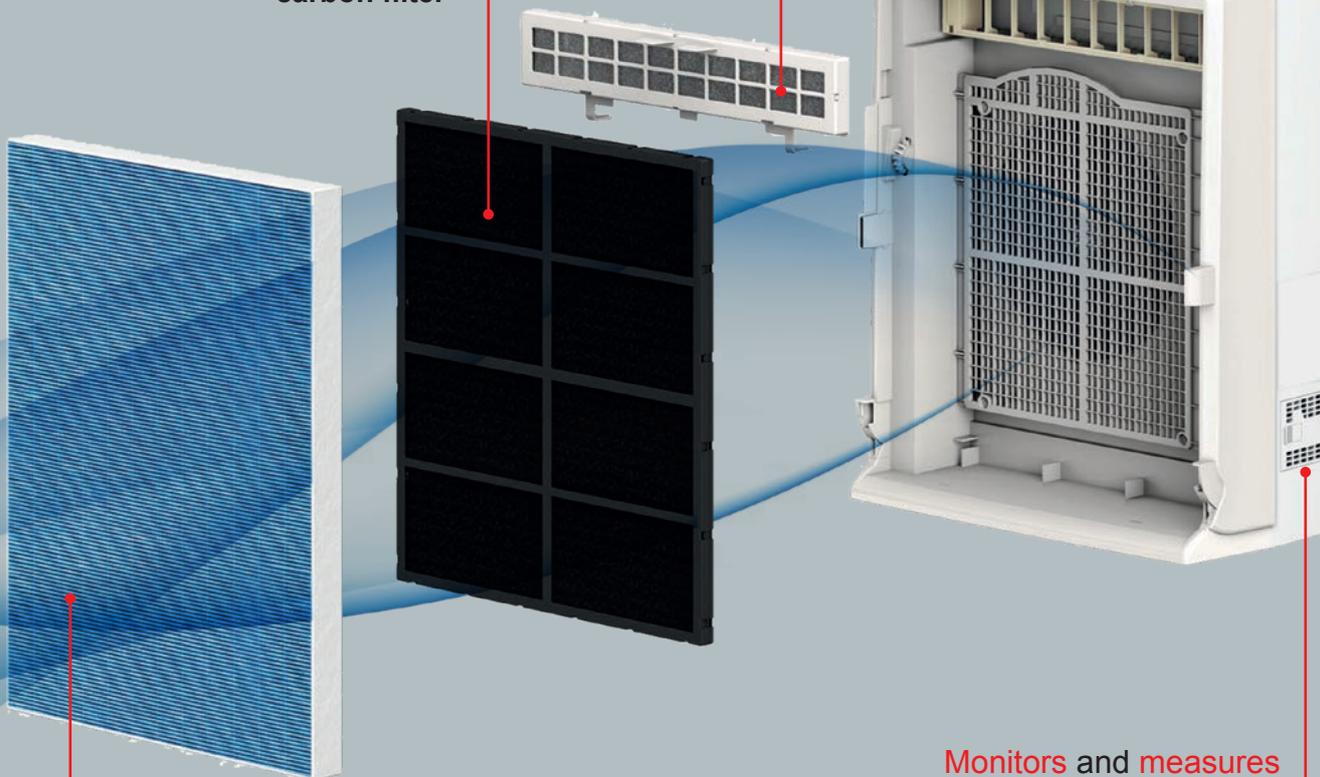

Purifies and deodorizes
the air,
removing up to 99%
of formaldehyde, VOCs,
ammonia and benzene

Washable activated
carbon filter*

Deodorizing
action

Platinum
catalytic filter

Monitors and measures
the substances found in the
air to optimize purification

PM2.5 Sensor

Captures more than 99%
of airborne particles from 0.1
micron and above, including
viruses, allergens, dust, and
bacteria

High efficiency
HEPA filter

Evolved air management solutions

Monitors the room and detects the presence of people: no more annoying draughts

i-See sensor

Detects the substances found in the air to optimize purification

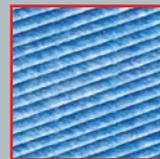

PM2.5 Sensor

Purifies and deodorizes the air, removing up to 99% of formaldehyde, VOCs, ammonia and benzene

Washable activated carbon filter*

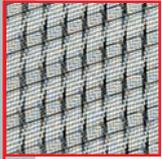

Captures more than 99% of airborne particles from 0.1 micron and above, including viruses, allergens, dust, and bacteria

Dual level high-efficiency HEPA filter

*For more details, refer to the product's technical specifications.

MA-E100R-E Air purifier

Captures larger diameter particles

Prefilter

A CLEAN AND COMFORTABLE ENVIRONMENT

Apart from its incredible air filtration and purification abilities, the MA-E100R-E air purifier monitors the environment around it: air quality is enhanced and living spaces become more agreeable.

The air flow is self-regulated and directed to wherever it is needed

Auto turn and motorized louvres

Detects airborne odours

Exceptionally high air quality

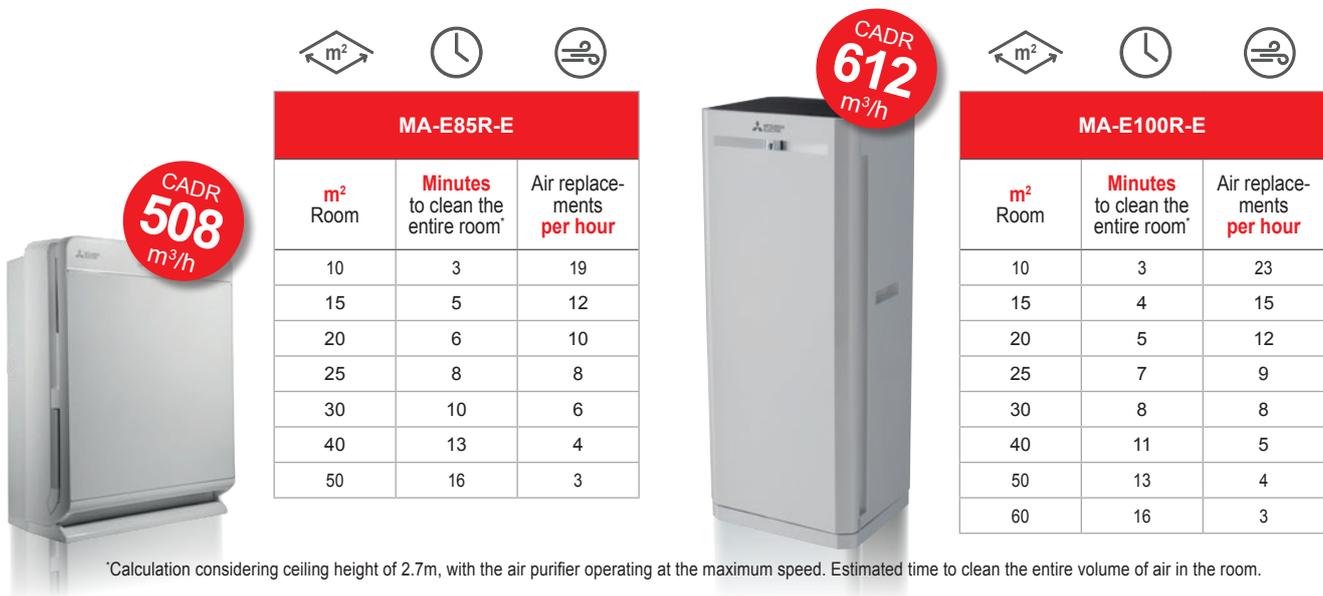

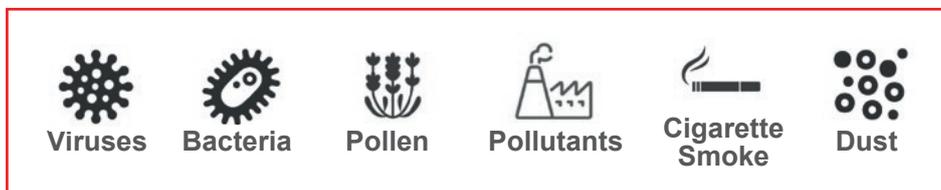

Which is the best air purifier for my needs?

MA-E85R-E and MA-E100R-E are designed to meet the needs of everyone, in all types of surroundings.

Higher **CADR** values mean less time required to clean the air in the room.

Model **MA-E85R-E** is the perfect solution if you need a compact appliance that's easy to transport and position in different rooms.

Model **MA-E100R-E** is the perfect solution if you're looking for an appliance with minimalist styling and high performance, ideal also for large rooms.

ACTIVATED CARBON FILTER

The activated carbon filter in Mitsubishi Electric air purifiers removes up to 99% of harmful substances.

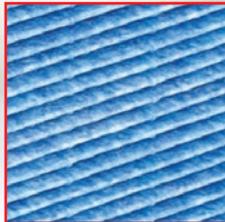

The activated carbon absorbs and removes formaldehyde, benzene, ammonia, VOCs, fumes, and odours present in the air.

The filter is washable and easy to service for longer life while guaranteeing the maximum performance at all times.

HEPA FILTER

Mitsubishi Electric has developed a HEPA filter that can remove airborne viruses, allergens, dust, bacteria, and pollutant particles from 0.1 micron and above. The result is exceptionally effective air purification with the removal of more than 99% of particles of 0.1 micron and above, and 99.97% of particles of 0.3 micron and above: a guarantee of truly clean air.

Enjoy the air around you

5 DIRECTIONS FOR A SUPER-IMMERSIVE AIR FLOW

AN IMMERSIVE AIR FLOW

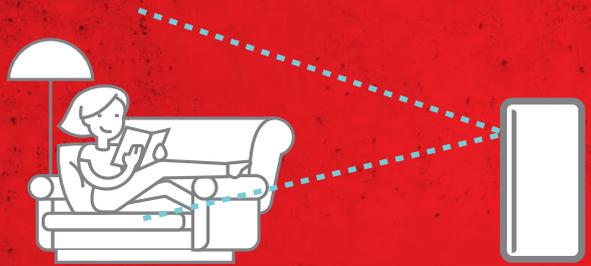

The purified air flow produced by Mitsubishi Electric air purifiers is massive in order to provide rapid and complete filtration.

Model MA-E85R-E guarantees a clean air delivery rate of 508 m³/h, while model MA-E100R-E guarantees a clean air delivery rate of 612 m³/h, values that are among the highest on the market.

IDENTIFIES AND TRAPS IMPURITIES

Thanks to "Smart search" and the motorized louvres, model MA-E85R-E can identify the contaminants present in the air and optimize its filtration actions. MA-E100R-E uses the iSee Sensor, Auto Turn, motorized louvres and different fan speeds to capture harmful substances in the air and direct the clean air delivery flow without disturbance.
